PROFILE

MSc Artificial Intelligence student at the University of Leeds with hands-on experience in machine learning, predictive modelling, time-series forecasting, and data analytics. Experienced in developing end-to-end data science projects using Python, Scikit-learn, XGBoost and Prophet. Interested in AI/ML engineering, NLP and building practical AI systems for real-world applications.

EDUCATION

University of Leeds, United Kingdom Sep 2026 – Sep 2027 (Expected)
MSc Artificial Intelligence

University of Wollongong, Singapore Apr 2024 – Mar 2026
Bachelor of Computer Science, Major in Big Data

Singapore Institute of Management, Singapore Apr 2023 – Mar 2024
Diploma in Information Technology

PROJECT EXPERIENCE

Deepfake Voice Detection Mobile App (FYP) | [Web Dashboard](#) Nov 2025 – Feb 2026
AI Application Developer

- Developed an Android-based mobile application to detect AI-generated (deepfake) voices during incoming calls using on-device ML inference.
- Designed a real-time call monitoring and alert system with confidence scoring, integrating Firebase for call records, trusted/blocked contacts, and detection history.

Mood Diary – AI-Powered Emotional Journal Prototype | [Web App](#) Oct 2025 – Aug 2026
AI Application Developer

- Developed and deployed a full-stack diary web app integrating OpenAI GPT-4o-mini for real-time emotion classification and personalised feedback, returning structured JSON (emotion label + confidence score).
- Collected 21 days of real user diary data and conducted a comparative analysis between GPT-4o-mini and a fine-tuned DistilBERT model (TF-IDF baseline ~88%, DistilBERT ~93%), achieving a 57.1% inter-model agreement rate.

NYC Energy Equity Dashboard – Hackathon Finalist Jul 2025 – Aug 2025
Data Engineer

- Integrated utility and census data to map energy burden and built an ROI module for solar, storage and energy efficiency program.
- Generated 36-month energy consumption forecasts with Prophet, comparing baseline and reduced – consumption scenarios to support policy recommendations.

ADDITIONAL INFORMATION

Technical Skills: Python, Java, SQL, JavaScript, Kotlin, HTML/CSS; Scikit-learn, TensorFlow, Pandas, NumPy, Matplotlib, Seaborn, Plotly, Prophet; React, TypeScript, Firebase, MongoDB; AWS, Git/GitHub, Vercel

Certifications: AWS Certified Data Engineer – Associate (Sep 2025); IBM Data Science Professional Certificate, Coursera (Sep 2026)

Honors & Awards: AI x City Climate Action Hackathon 2025 – Finalist; SIM Impetus Award (2025)

Languages: English (Full Professional), Korean (Native)
